

WIRELINE DEPTH COUNTERS

Arch Oil Tools is based in Perth, Western Australia and is the premier supplier of wireline tools and accessories to oil and gas service companies in Australia and South-East Asia. Our customers include all the major service providers including Schlumberger, Halliburton, Expro Group, SGS, Geoservices, GSC and Japex as well as companies that run wireline services for their own assets.

We provide technical support on all products that we recommend and sell as we are not biased towards any one company due to agency agreements. We can source direct from the manufacturer or their distributors which allows us to get the best possible price and delivery for our customers.

Depth Counters:

The industry and our customers have tried several depth counters manufactured by different companies. Field operators require that the counters have the following features:

- Heavy duty and rugged assembly
- Large display
- Precision linear measurement
- Corrosion and dust resistant
- Easy reset
- Heavy duty shaft and bearings
- Geared ratio to suit measuring wheel
- Easy installation

Using field requirements into consideration, the industry standard for more than the past 10 years have been the following two models made by Danaher Controls – **Veeder Root** brand:

High Speed Worm Depth Counter Model 1164

Metric 116425-011 1.6

Imperial 116425-010 0.5

- Bold 5 character display – 0.344" high x 0.25" wide
- High visibility white on black background
- Zamak alloy die cast base for strength, durability and corrosion resistance
- Porous bronze long life bearing
- Stainless steel shaft
- Corrosion and dust resistant steel body
- Heavy duty construction
- Wing nut reset for quick operation with cam lock feature
- Counter rotation forward and back for wireline depth measurement
- Choice of two gear ratios to match standard wireline measuring heads
- No lubrication required
- Input can be modified for any keyed flexible shaft
